

## Anti-HIV-1 Reverse Transcriptase Antibody

Immuned Animal: Guinea Pig

Polyclonal antiserum

65-003

50 µl

HIV-1 reverse transcriptase is an RNA-dependent DNA polymerase of HIV-1(AIDS virus), subtype B origin (1). It also has RNaseH activity and is an enzyme indispensable to the reproduction of AIDS virus.

The product is prepared by immunizing guinea pig with HIV-1 reverse transcriptase which was uniquely over-expressed as recombinant protein in *E. coli* by a patent method and highly purified (2).

Using this antiserum in Western blotting, the bands of 66 kD and 51 kD corresponding respectively to the two subunits of HIV-1 reverse transcriptase were observed in the extract of the AIDS virus infected cells (Fig 1).

### Usage

- 1) It can be used in Western blotting or ELISA for HIV-1 reverse transcriptase detection and titration.

### Specification

Form: 0.09% sodium azide added to the antiserum.

Storage: 4°C
