$\begin{array}{c} T\text{-}4049 \\ Rabbit \ anti-Endothelin-1 \ (human, \ bovine, \ dog, \ mouse, \ porcine, \ rat) \\ IgG \end{array}$

Each vial contains 400ug of rabbit IgG in lyophilized form, which was purified from whole serum by protein A column chromatography. Upon reconstitution with 200µl of distilled water, the solution contains 0.1M PBS (pH 7.4) and 0.02% thimerosal.

Lyophilized products are stable for long periods when stored at $2-8^{\circ}$ C. It is recommended that the reconstituted material be aliquotted and stored at -20° C (or below) for long-term storage. Repeated freezing and thawing should be avoided.
