Rabbit anti- Proadrenomedullin (45-92) (human) IgG

Each vial contains 400 ug of rabbit IgG in lyophilized form, which was purified from whole serum by protein A column chromatography. Upon reconstitution with 200µl of distilled water, the solution contains 0.1M PBS (pH 7.4) and 0.02% thimerosal.

Lyophilized products are stable for long periods when stored at 2-8°C. It is recommended that the reconstituted material be aliquotted and stored at -20°C (or below) for long-term storage. Repeated freezing and thawing should be avoided.

Cross Reaction:

| PEPTIDE: | %: |
|-----------------------------------|-----------|
| Proadrenomedullin (45-92) (human) | 100 |
| Adrenomedullin (1-50) (rat) | 0 |
| Adrenomedullin (1-52) (human) | 0 |
| Proadrenomedullin-N20(human) | 0 |
| Proadrenomedullin-N20(rat) | 0 |
