Anti NPY (Human, Mouse, Rat) Serum

Cat. No. Y060 Lot No. 028271027

Description: This antiserum which recognizes the central portion $(20\sim25)$ of the peptide was raised in a rabbit by immunization with a carrier free synthetic NPY (human, mouse, rat) peptide. The product vial contains 50 μ L of the titled antiserum obtained by lyophilizing its 0.001 M phosphate buffer (pH 7.0, 0.5mL) solution. It can be used for immunoassay, immunohistochemistry or any other immunoreaction with NPY (human, mouse, rat).

Immunogen: Synthetic NPY (human, mouse, rat), carrier free Host: Rabbit

Amino Acid Sequence of NPY (human, mouse, rat)11:

YPSKPDNPGE DAPAEDMARY YSALRHYINL ITRQRY-NH2

Product Form: Lyophilized unpurified serum Size: 50 μ L

Reconstitution: Reconstitute the product with 0.5mL of 0.01M PBS (pH 7.0) to make a 10 fold diluted stock solution. If it is stored in a refrigerator, add moderate antiseptic to the solution (e.g. NaN₃ 0.1%).

Storage: The product will be stable for over one year if it be stored at -20°C to -80°C until opened. Upon reconstitution, the antiserum solution must be stored at 2°C to 8°C and used within one month. Repeated freezing-thawing should be avoided.

Suggested Working Dilution Range: 1:2,000-5,000 (final dilution~1:35,000) for radioimmunoassay. 1:1,000-4,000 for immunohistochemistry (frozen or paraffin sections). Optimal dilution should be determined by each laboratory for each application.

Specificity (based on radioimmunoassay): NPY (human, mouse, rat) 100%, NPY (porcine) 100%, NPY (1-19) (human, mouse, rat) 0%, NPY (20-36) (human, mouse, rat) 25.6%, NPY (26-36) (human, mouse, rat) 0%, PYY (porcine) 100%, PP (human) 0%, PP (rat) 0%

Positive Control (immunohistochemistry): Rat pancreas. (Caution: it also stains PP cell)

Species Tested: Rat, snake, tuna fish, gingseng radix^{2,3,4,5)}
